Карнизы комбинированные

|| *И*спользование потолочных профилей, комбинированных на стенах и потолке, придает интерьеру четкий рельеф и завершенность композиции. Благодаря литым углам DP-5042, DP-5052 и подходящим профилям DP-5040, DP-5050 (линейный профиль) и DP-5041, DP-5051 (профиль с рисунком) Вы создадите индивидуальный интерьер.

Инструкция по монтажу

!!! Пенополиуретан - материал прочный, легкий, гибкий. Прост в обращении.

При правильном хранении и условиях монтажа, материал не бьется, не крошится и не боится влаги. Поверхность изделий гладко отшлифована и подготовлена для покраски.

ВАЖНО! Для обеспечения качественного крепления потолочного профиля не следует допускать резких перепадов температур и влажности между условиями хранения и монтажа. Монтаж профилей производится непосредственно на стену. Старые обои, размокшая или рыхлая штукатурка должна быть предварительно удалена, а неровности зашпатлеваны.

Следуя простой и понятной инструкции можно установить потолочные профили самостоятельно.

1 Протрите поверхность профиля от пыли, поскольку пыль препятствует надежности клеевых соединений.

2 Определите высоту профиля, сделайте пометки на стене и потолке.

3 С помощью стусла и мелко-зубчатой ножовки или острого ножа, сделайте нужные срезы для острых углов.

4 Перед нанесением клея, удалите опилки с мест разреза, слегка обработайте обрезанные края мелко-зернистой наждачной бумагой и проверьте точность подгонки. Клей можете наносить с помощью клеевого пистолета или шпателя.

5 Установите профиль в угол между потолком и стеной, и осторожно прижмите.

6 Заполните все стыки клеем для декоративных профилей. С помощью шпателя удалите излишки и сразу протрите влажной губкой.

7 После полного высыхания клея, удалите его излишки при помощи острого ножа.

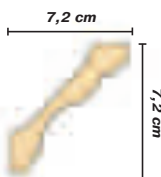

8 Профили можно красить спустя 24 часа после установки водо-эмульсионной краской или краской, которая не содержит растворителя.

!!!! Важно: для подрезки молдингов необходима торцовочная электропила, снабженная диском для резки пластика или алюминия (мелкий зуб). При подрезке изделия нужно делать резкие движения вниз и вверх, что позволяет пластику не плавиться.

Необходимые инструменты: торцовочная электропила; пистолет для клея; рулетка; монтажный клей («жидкие гвозди»); шпатель для нанесения клея; крупнозернистая шкурка для зачистки мест нанесения клея; мелкозернистая шкурка для удаления клея после затвердевания; саморезы; отвертка; молоток; отделочные гвозди, для предотвращения сползания изделий в момент высыхания клея.

1. До момента монтажа выдержать интерьерные молдинги в помещении не меньше суток, для адаптации.
2. Стены, потолок и изделия должны быть сухими и чистыми.
3. Крепить изделия необходимо на предварительно выровненные стены.
4. Покраску стен и потолков, а также поклейку обоев рекомендуется проводить после монтажа изделий.
5. Необходимо производить расчет материала, учитывая потери при срезании углов. Также необходимо учесть повторение рисунка.
6. Предварительно сделать разметку на стене.
7. Для предотвращения сползания изделия в момент высыхания клея нужно просверлить отверстия под саморез или вбить мелкие отделочные гвозди. После высыхания клея саморезы или гвозди вынуть и зашпаклевать эти места.
8. Отметьте на молдингах места среза для соединения углов или изделий под углом 45.
9. Сделайте нужные срезы для угловых стыков по лицевой стороне изделия.
10. Зашкурьте поверхность изделия, которая будет прикасаться к стене, крупной шкуркой.
11. Нанесите монтажный клей и равномерно распределите его шпателем по всей поверхности изделия, которая будет соприкасаться со стеной.
12. Приложите изделие к стене и приклейте его, слегка надавливая. Снимите излишки клея шпателем.
13. Для стыковки изделий нанесите на одну из поверхностей клей, состыкуйте элементы с уже установленными изделиями, выдавливая лишний клей. Максимально притяните изделия друг к другу, удалите излишки клея с помощью губки.
14. При необходимости, спустя сутки после монтажа места соединений изделий можно подкрасить краской, не содержащей растворителя. Также можно использовать мягкий воск и ретуширующие карандаши.
